Superintendent of Schools

3/1/19

Mr. Wade White,

I wanted to write and say thank you, again, for the inspiring program you provided for our students. The Measured By Character program you provided for the students in Quinlan ISD was fantastic. You spoke to our intermediate, middle school students, high school students and community members as well. These are very different groups and ages of students and at each level the student and staff responses were extremely positive. I want to thank you very much for visiting and providing our school with such a quality program. Thank you for your interaction with our students and the way you made the subject of character real to them. When you see 600 middle school students in silence and focused on the speaker you know they are getting something valuable. I know the impact your program had on the students was extremely positive because in the afterschool program students were still excited and talking about your visit. All the students in QISD go through character education and your message to our students has made a positive difference on our school climate. If you need to include me as a reference for any schools considering you for a future program please feel free to do that. Once again thank you for taking the time to impact the lives of our students. It was a pleasure and an honor to get to meet with you. I have a great amount of respect for what you are doing. You are impacting lives and making this world a better place, one school at a time. Thank you!

Respectfully,

Michael Tull

Director, Student Leadership Programs and PRIDE Academy, QISD
